Neem Anti-Acne Cosmetic — Product Dossier

Cosmetic product dossier for classification and regulatory review

Product overview

PureNeem Clarifying Cream is a commercial cosmetic for acne-prone skin, based on Neem (Azadirachta indica) leaf extract. It is sold commercially and marketed online and in retail.

Ingredients and source

1. Neem (Azadirachta indica) leaf extract — a biological resource with long traditional use in Ayurveda and Unani texts for skin conditions.
2. Aloe vera (Aloe barbadensis) gel — soothing cosmetic base ingredient.

Processing / manufacturing method

Cold-pressed neem leaf extract is blended into a cosmetic oil-in-water emulsion cream base with standard cosmetic preservatives. No medicinal decoction or classical process is used.

Intended use and claims

Positioned as a skin-care cosmetic for acne-prone skin. Claims: 'Helps clarify skin and reduce breakouts.' No disease-treatment claim is intended; it is a cosmetic.

Modifications and novelty

This is a novel cosmetic emulsion rather than a classical medicinal formulation; the neem extract is used in a modern cosmetic delivery format.

Commercialization and origin

Neem leaves are sourced from cultivated trees in Uttar Pradesh, India. Intended for commercial domestic sale and e-commerce export.
